## Biography

Paris Thorpe is a genre-defying artist and songwriter whose music blurs the line between vulnerability and ritual. Drawing inspiration from the emotional intensity of Sleep Token and the intimacy of Billie Eilish, Paris writes from the deepest parts of herself, offering haunting, atmospheric songs that feel both sacred and raw. Her work is emotionally fearless, inviting listeners into spaces rarely shared, where sound becomes confession and silence becomes sanctuary.

*“I have previously had the pleasure of working with Paris. Within each project, Paris has always shown the ability of managing the group so tasks never fall behind and stick to the deadlines. As a musician, Paris shows drive and passion towards her vocal recordings, putting in numerous amount of hours to perfect a track, whether it being her own or a clients project. Paris is bubbly and energetic to be around when working with, but also knows when to be serious during important tasks, creating a happy fun working environment with a professional output.”*
